Terry Crews spent decades cultivating his bodybuilder physique and bravado. On the outside, he seemed invincible: he escaped his abusive father, went pro in the NFL, and broke into the glamorous world of Hollywood. But his fixation with appearing outwardly tough eventually turned into an exhausting performance in which repressing his emotions let them get the better of him leading him into addiction and threatening the most important relationships in his life. Now Crews is sharing the raw, never-before-told story of his quest to find the true meaning of toughness. In *Tough*, he examines arenas of life where he desperately sought control of masculinity, shame, sex, experiences with racism, and relationships and recounts the setbacks and victories he faced while uprooting deeply ingrained toxic...

Racism and Revenge in the British Raj

BLOOMSBURY

In July 1765 Robert Clive, in a letter to Sir Francis Sykes, compared Gomorrah favorably to Calcutta, then the capital of British India. He wrote: I will pronounce Calcutta to be one of the most wicked places in the Universe. Drawing upon the letters, memoirs, and journals of traders, travelers, bureaucrats, officials, officers and the occasional bishop, Doolally Sahib and the Black Zamindar is a chronicle of racial relations between Indians and their last foreign invaders, sometimes infuriating but always compelling. A multitude of vignettes, combined with insight and analysis, reveal the deeply ingrained conviction of 'white superiority' that shaped this history. How deep this conviction was is best illustrated by the fact that the British abandoned a large community of their...

From Adam Smith to John Maynard Keynes, and from the Great Depression to the collapse of the Lehmann Brothers, Desai studies the contributions of economics to domestic and international politics. The Poverty of Political Economy asks necessary and startling questions: Where have we fallen short? How have changes in the international order affected the making of economies? In the face of Covid-19, how do we reinvent the way that economic policies are formed? This is a remarkable thesis by one of the foremost political economists of our time. On any given morning, you might wake up and shower with water, make your coffee with water, flush your toilet with water, and think nothing of it. But around the world, more than three-quarters of a billion people can't do any of that because they have no clean water source near their homes. And 1.7 billion don't have access to a toilet. This crisis affects a third of the people on the planet. It keeps kids out of school and women out of work. It traps people in extreme poverty. It spreads disease. It's also solvable. That conviction is what brought together movie actor Matt Damon and water expert and engineer Gary White. They spent years getting the answer wrong, then halfway right, then almost right. Over time, they and their organization, Water.org, have found an approach that...

The COVID-19 pandemic has illustrated how actions taken for the management of a public health emergency can bear significant implications for individual liberty, dignity, and privacy. Collection of health data, contact tracing, mandatory testing, and vaccine passports are some examples of such interventions. However, these tensions are certainly not new. Nor are they limited to situations of health emergencies. The everyday interactions between the individual, the community, and the public health ecosystem raise several questions about how to balance the state's legitimate public health interests with the informational privacy, bodily integrity, and decisional autonomy of citizens. Set against the background of the COVID pandemic, the creation of the National Digital Health Mission, and...
