Imagine this. You reach for your phone to check what your friends have been up to on Facebook and Instagram. You see too many alerts on your WhatsApp. You realize, to your horror, that there are some nasty pictures of you on a social media site you have not even heard of. Every day, hundreds of people face these situations. People's money gets stolen and their digital identities robbed. Some have their public image maligned. Kids and young adults suffer depression from cyberbullying. People are cajoled into doing stuff they don't want to do...all from the big bad Internet. The Internet is an integral part of our lives now. We cannot do away with it. We can, however, learn to navigate it. **Monkey, Shakespeare, Typewriter, Cybersecurity for Everyone** is a handy guide for anyone who uses the...

How to Improve Your Decisions. Enhancing consciousness in decision-making. How can decisions be improved by detecting and managing inherent weaknesses? This book analyses the practical implications of behavioral economics among decision-makers to encourage active creative thinking and drive individuals and organizations to make better decisions. Going beyond behavioral economics, this book uses psychology, philosophy, and anthropology to demonstrate the myths that govern behavior, our natural longing for inclusion, and the power held by those setting the agenda in our vicinity. This book enables active thinking and encourages individuals to be a useful asset to their companies by using System 2 thinking deliberate, slow, and controlled thinking to...

Featuring leading scholars from philosophy and religious studies, The Bloomsbury Research Handbook of Indian Ethics dispels the myth that Indian thinkers and philosophers were uninterested in ethics. This comprehensive research handbook traces Indian moral philosophy through classical, scholastic Indian philosophy, pan-Indian literature including the Epics, Ayurvedic medical ethics, as well as recent, traditionalist and Neo-Hindu contributions. Contrary to the usual myths about India that Indians were too busy being religious to care about ethics, moral theory constitutes the paradigmatic differentia of formal Indian philosophy and is reflected richly in popular literature. Many of the papers make this clear by an analytic explication that draws critical comparisons...

In India we tend to have a fatalistic attitude towards suicide, tending to believe that nothing can be done to prevent it, focusing only on the politically volatile issue of farmer suicides, or periodically when there is a death by suicide of a prominent personality or suicides in vulnerable groups for example, students, especially after board exam results, there is a hue and cry in the popular press with opinion makers demanding immediate action. The resulting knee-jerk reaction from policymakers is to offer some immediate solutions appointing counselors in colleges, etc. which have little evidence of success. After a while, everyone forgets the issue, until the next such event and the cycle repeats itself. Why should you care? Because a disproportionate number of young Indians die by suicide and these are...

In an age of pandemics, the relationship between the health of the city and good sanitation has never been more important. Waste in the City is a call to action on one of modern urban life's most neglected issues: sanitation infrastructure. The Covid-19 pandemic has laid bare the devastating consequences of unequal access to sanitation in cities across the globe. At this critical moment in global public health, Colin McFarlane makes the urgent case for Sanitation for All. The book outlines the worldwide sanitation crisis and offers a vision for a renewed, equitable investment in sanitation that democratizes and socializes the modern city. Adopting Henri Lefebvre's concept of 'the right to the city', it uses the notion of city to reframe the discourse on sanitation from a narrowly defined policy...

The text introduces the dynamics of a system of particles in detail to study the motion of rigid bodies, assuming they are collections of particles. Rigid body motion is introduced along with moments and products of inertia, momental ellipsoid, principal axes, kinetic energy, and angular momentum in terms of inertia constants. D'Alembertian, Eulerian, Lagrangian, and Hamiltonian formulations describing the motion of rigid bodies are given in sequential chapters, emphasizing how these approaches are related to each other. The theory of small oscillations for a dynamical system, canonical transformations, Poisson brackets, and calculus of variations are discussed as well. The textbook covers all required topics of classical mechanics courses at both undergraduate and...

These challenges stick out like the visible tip of an iceberg, while culture, the biggest challenge, is like the slow-moving, gigantic mass that lurks deep under the surface. We cannot deal sufficiently with superficial problems if we do not understand the depths that drive them. Culture eats strategy for breakfast is a widely accepted saying in the business world, often attributed to Peter Drucker. This is as true for corporate India as it is for its consumers. Yet, we spend more time and money studying our consumers and their cultures than we do ourselves. The Company We Keep is a market...

Successful project management of construction projects is largely dependent on the confident handling of construction costs and schedules. For contractors, the ability to reliably plan costs is an essential quality feature of a good architect, and hence one of the most important basics of project preparation. Cost estimation is also vital in preparing project budgets, and it particularly requires an efficient methodology that can immediately reveal possible planning-related cost overruns. Central key concepts such as cost variables or life-cycle costs, costing methods, and cost control methods form an essential repertoire for all practicing architects. Basics Budgeting explains cost planning processes during the planning and construction phase step-by-step and on a practical...

1989 marks the unraveling of India's 'Nehruvian Consensus' around the idea of a modern, secular nation with a self-reliant economy. Caste and religion have come to play major roles in national politics. Global economic integration has led to conflict between the state and dispossessed people, but processes of globalization have also enabled new spaces for political assertion, such as around sexuality. Older challenges to the idea of India continue from movements in Kashmir and the Northeast, while Maoist insurgency has deepened its bases. In a world of the American Empire, India as a nuclear power has abandoned non-alignment, a shift that is contested by voices within. Power and Contestation show that the turbulence and turmoil of this period are signs of India's continued vibrancy and...
