The Thinking Machine

Jensen Huang, Nvidia, and the world's most coveted microchip

STEPHEN WITT

Acc. No : 50462
Call No : 006.3 WIT-S

In June 2024, thirty-one years after it was founded in a diner, Nvidia became the most valuable corporation on Earth. The Thinking Machine is the astonishing story of how a designer of video game equipment conquered the market for AI hardware, and in the process, reinvented the computer. Essential to Nvidia's meteoric success is its visionary CEO Jensen Huang, who, more than a decade ago, on the basis of a few promising scientific results, bet his entire company on AI. Through unprecedented access to Huang, his friends, his investors and his employees, Stephen Witt documents for the first time the company's epic rise and its single-minded and ferocious leader, now one of Silicon Valley's most influential figures. The Thinking Machine is the story of how Nvidia evolved to supplying hundreds...

MASTERING Google Gemini

Unlock the Full Power of Google's AI
to Automate Tasks, Create Content,
Boost Productivity, and Stay
Organized in Daily Life

MILA ASHFORD

Acc. No : 50440

Call No : 006.33 ASH-M

Unlock the Full Power of Google's AI to Automate Tasks, Create Content, Boost Productivity, and Stay Organized in Daily Life. Are you ready to unlock the future of artificial intelligence right from your phone, tablet, or desktop? Mastering Google Gemini is not just another tech manual-it's your ultimate passport into the extraordinary world of Google's revolutionary AI. Whether you're a student, entrepreneur, educator, content creator, or someone who simply wants to do more in less time, this book is your all-access guide to transforming your everyday life with the unmatched power of Gemini. From automating your daily tasks, summarising lengthy emails, organising your schedule, creating compelling content, to managing complex projects, Gemini is your intelligent personal assistant...

URBAN THEORY

NEW CRITICAL PERSPECTIVES

EDITED BY
MARK JAYNE AND KEVIN WARD

Acc. No : 50432

Call No : 307.76 JAY-M

Urban Theory, New Critical Perspectives provides an introduction to innovative critical contributions to the field of urban studies. Chapters offer easily accessible and digestible reviews, and as a reference text, Urban Theory is a comprehensive and integrated primer which covers topics necessary for a full understanding of recent theoretical engagements with cities. The introduction outlines the development of urban theory over the past two hundred years and discusses significant theoretical, methodological and empirical challenges facing the field of urban studies in the context of an increasingly globally interconnected world. The chapters explore twenty-four topics, which are new additions to the urban theoretical debate, highlighting their relationship to long-established concerns that...

Policy as Practice

Making Sense of
Governing

Edited by **H.K. Colebatch**
and **Callista Castles**

Acc. No : P00049

Call No : 320.6 COL-H

Colebatch, Castles and a collection of policy practitioners and scholars investigate the process of policy making through a range of current policy issues in Australia. With case studies including childcare, educational policies, mental health, and environmental policies, the expertise and experience of policy practitioners and academic observers offer an empirical understanding of what makes for policy work in practice. From problematising to participating, structuring to judging, the authors reflect on the significance of the practices of governing in relation to current policy issues in Australia. They also present a robust conceptual framework for making sense of how we are governed to draw meaningful inferences about policy as a practice. A practical guide for students and practitioners of...

COMPLEXITIES OF FINANCIAL GLOBALISATION

ANALYTICAL AND POLICY ISSUES IN EMERGING AND DEVELOPING ECONOMIES

Tony Cavoli, Sasidaran Gopalan
and Ramkishen S. Rajan

Acc. No : 48449

Call No : 332.0420 CAV-T

Since the 1990s, several emerging market and developing economies have, to varying degrees, embraced the process of financial globalisation, broadly defined as a set of policies that involve allowing for greater openness to cross-border capital flows as well as greater market access to foreign financial institutions. This book provides a systematic empirical analysis of the complex interactions between financial sector development, macroeconomic and financial stability in EMDEs in general and those in the Asian region in particular. The book consists of three sections pertaining to monetary and exchange rate policies under financial globalisation, financial inclusion and macroeconomic policies in the context of financial liberalisation, and finally, the dynamics of foreign...

OXFORD

ARUN KUMAR

PHILANTHROPY AND THE DEVELOPMENT OF MODERN INDIA

In the Name of Nation

CRITICAL FRONTIERS OF THEORY, RESEARCH, AND POLICY
IN INTERNATIONAL DEVELOPMENT STUDIES

Acc. No : 50344

Call No : 338.954 KUM-A

Drawing on the history of the philanthropy of India's economic elites, Arun Kumar discusses how their ideas and understanding of development have shifted and changed over time. Going beyond the more familiar criticisms of development's entanglements with colonialism, Kumar interrogates the changes in development imaginaries in terms of modernity's entanglements with the national question, including anti-colonial nationalism and post-colonial nation-building during the twentieth century. Development, he suggests, can be usefully read and critiqued as national-modern. *Philanthropy and the Development of Modern India* plots the careers of the national-modern in four main sites of development: civil society, community, science and technology, and selfhood. In an unusual...

[In]Complete Justice?

*The Supreme Court
at 75*

CRITICAL REFLECTIONS

edited by

S Muralidhar

Acc. No : 50453

Call No : 347.54035 MUR-S

India's top legal minds on the issues that define justice. In its seventy-fifth year, how should one view the Supreme Court of India, an institution that has not only transformed in its composition and functioning but has also been a catalyst for change in other branches of the State? How has it fared in terms of accountability, transparency and its responsibility to both the law and the people? Has it consistently managed to strike the delicate balance between judicial activism and the imperative of accountability in the exercise of judicial power? To what extent has the Court fulfilled its role as a counter-majoritarian body capable of checking majoritarian impulses and the excesses of State power? Has it remained true to its constitutional mandate, interpreting the Constitution in the spirit of its...

GLOBAL CLIMATE CHANGE

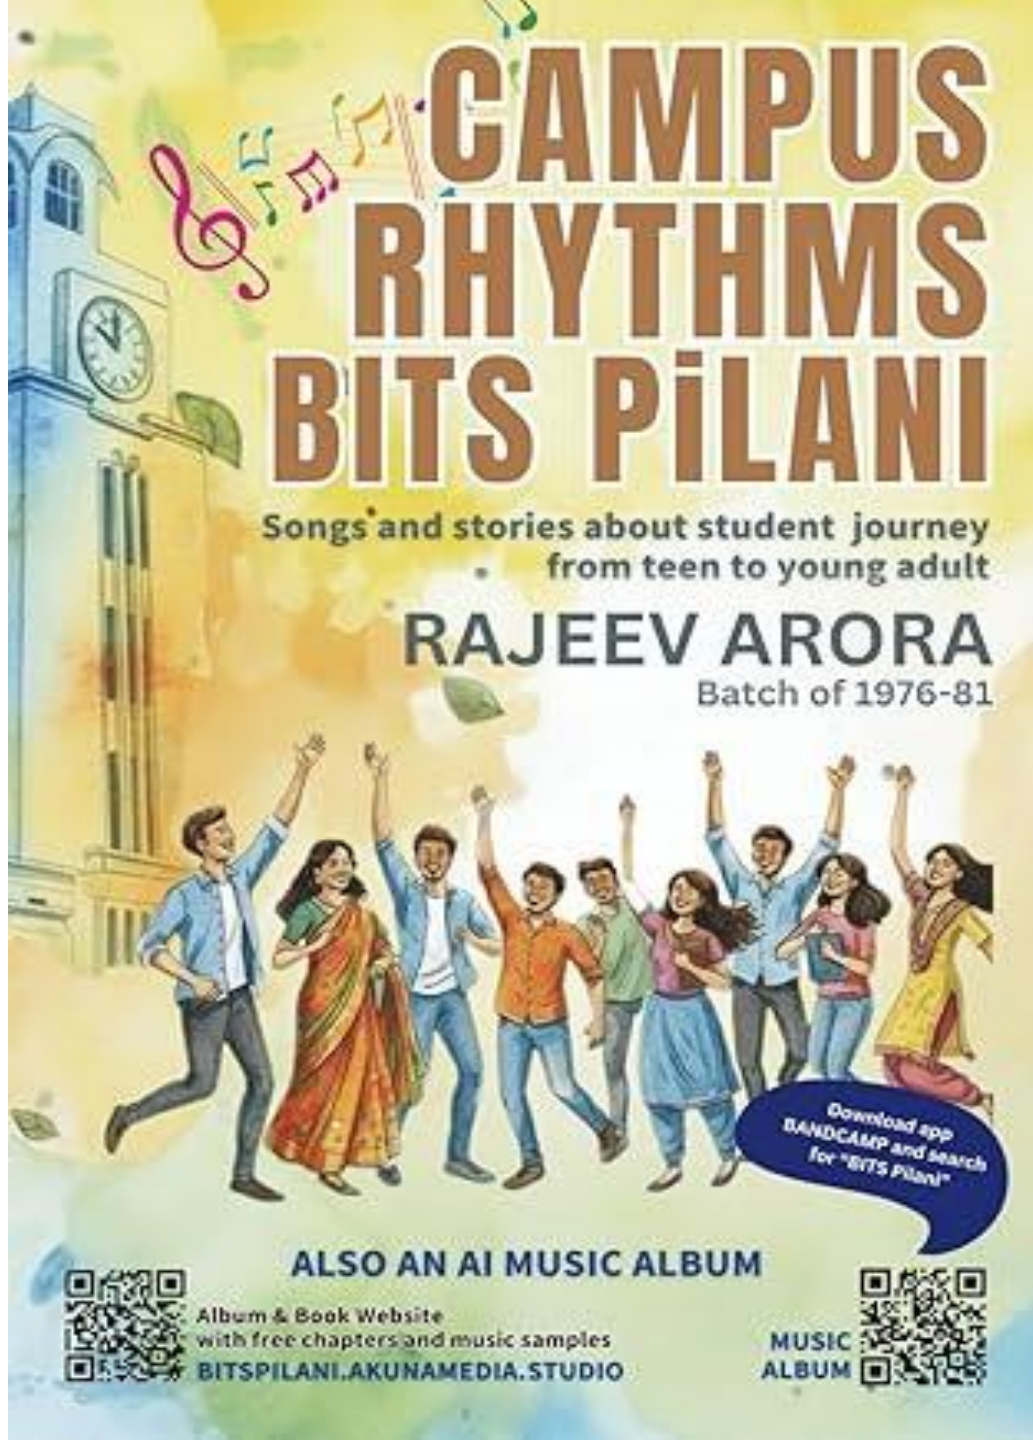

A GUIDE FOR FUTURE ACTION

Malcolm Prowle

Acc. No : 50189

Call No : 363.738 PRO-M

Recently, large parts of the world faced record high temperatures, another item on a long list of warning signs about the climate. This book is for the reader interested in having a better understanding of the nature and causes of climate change and the measures being undertaken. Global Climate Change suggests success is unlikely, and to prevent catastrophe, more radical and uncomfortable actions will be needed. Many groups in society, e.g. governments, economies, businesses, and public services, will need to undertake such actions to mitigate climate change and deal with its consequences. This book guides what these actions will involve. Climate change is, undoubtedly, the biggest challenge facing humanity throughout the whole of its history. It is, largely a consequence of the rising...

Acc. No : G0098

Call No : 378.547 ARO-R

A teenager arrives at Loharu train station with a golden ticket to an engineering career with admission to BITS Pilani, a revered engineering college, just 30 minutes bus ride away. He or she has little or no idea of what rainbows and storms lie ahead. New horizons to be explored, and many brick walls will be hit. A few will not make it to the other end of this journey. Romance, academic enlightenment, fun, extreme competition, cultural festivals, and extreme flexibility? What will be the shining light in this journey? Who and what will help him or her make it through? How will this prepare him or her for the future? You could hear those stories, sometimes too personal and too impersonal at other times or better still, here you read them as songs or, better still, songs with their back stories...

Quantum Variational Calculus

Acc. No : E-Book

Call No : 515.64 MAL-A

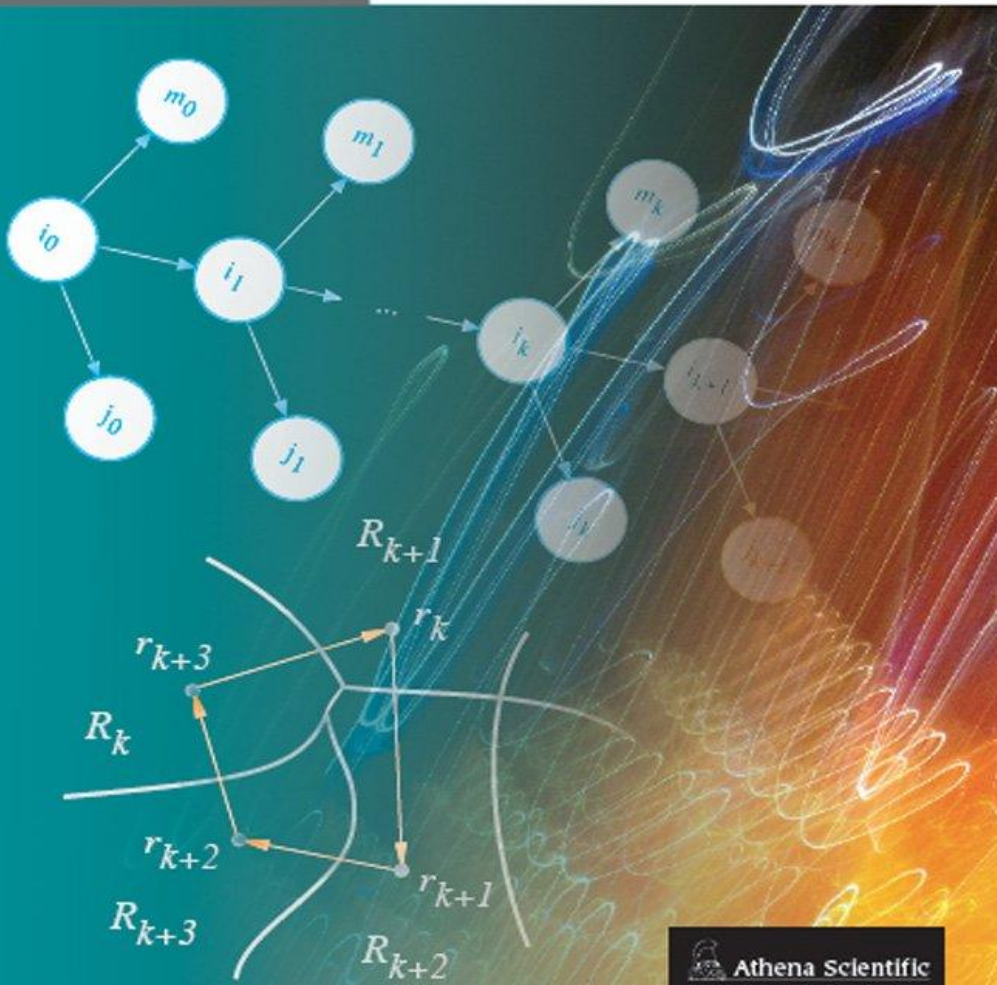

This Brief puts together two subjects, quantum and variational calculi, by considering variational problems involving Hahn quantum operators. The main advantage of its results is that they are able to deal with nondifferentiable, even discontinuous functions, which are important in applications. Possible applications in economics are discussed. Economists model time as continuous or discrete. Although individual economic decisions are generally made at discrete time intervals, they may well be less than perfectly synchronised in ways that discrete models postulate. On the other hand, the usual assumption that economic activity takes place continuously is nothing but a convenient abstraction that in many applications is far from...

Dynamic Programming and Optimal Control

APPROXIMATE DYNAMIC PROGRAMMING

Dimitri P. Bertsekas

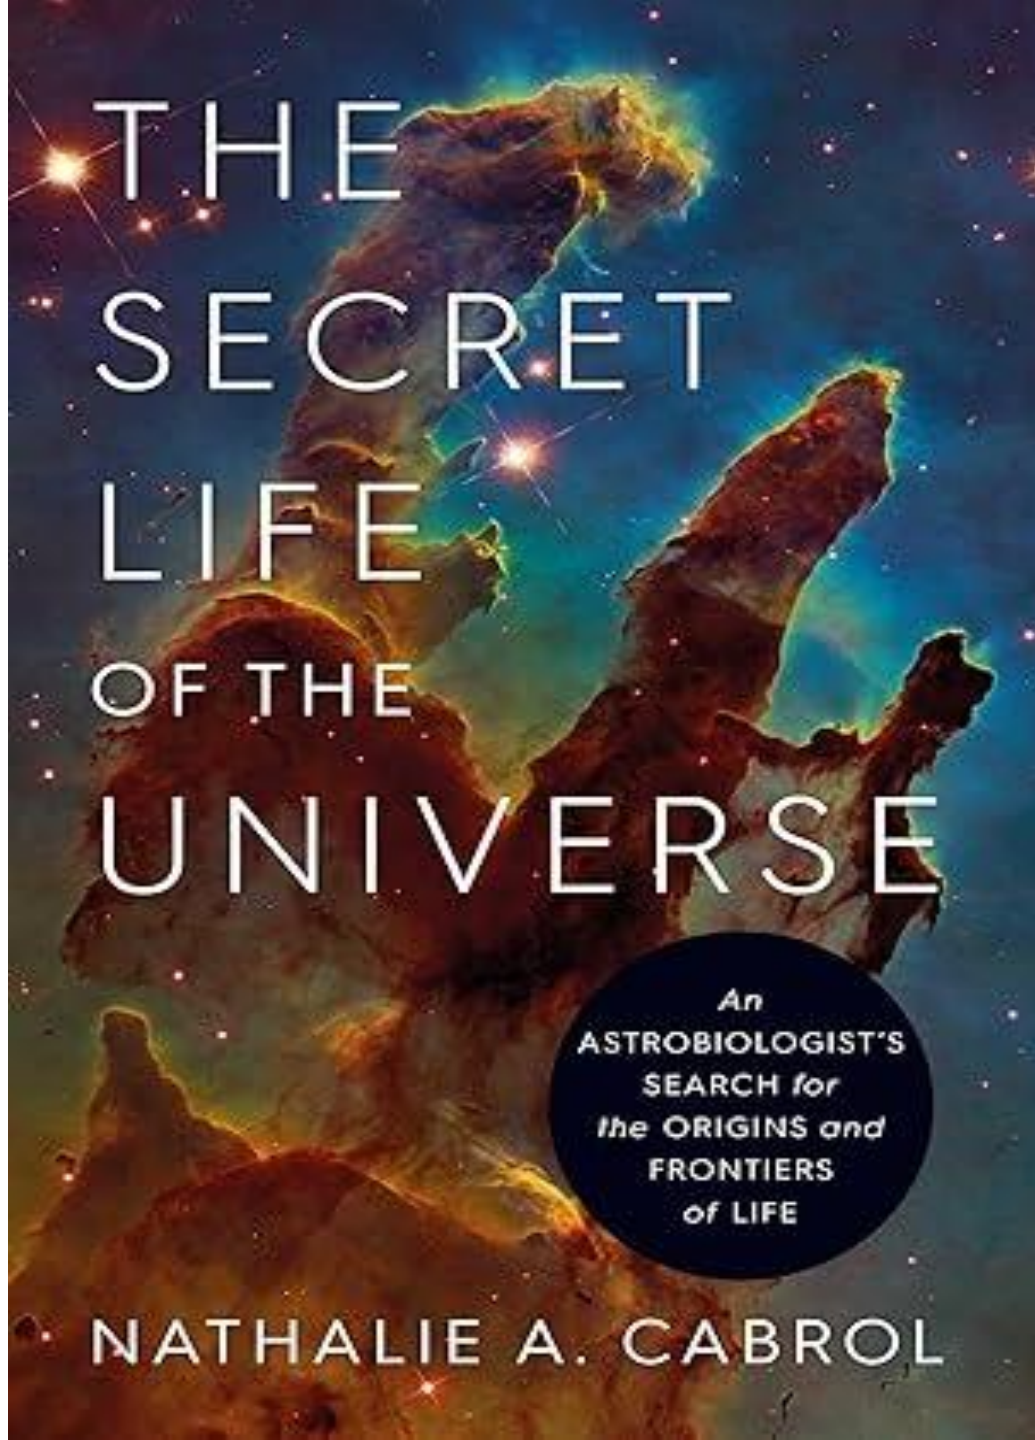

Athena Scientific

Acc. No : 48901

Call No : 519.703 BER-D

This is the leading and most up-to-date textbook on the far-ranging algorithmic methodology of Dynamic Programming, which can be used for optimal control, Markovian decision problems, planning and sequential decision making under uncertainty, and discrete or combinatorial optimisation. The treatment focuses on basic unifying themes and conceptual foundations. It illustrates the versatility, power, and generality of the method with many examples and applications from engineering, operations research, and other fields. It also addresses the practical application of the methodology, possibly through the use of approximations, and provides an extensive treatment of the far-reaching methodology of Neuro-Dynamic Programming or Reinforcement Learning. Among its...

Acc. No : 50490

Call No : 520 CAB-N

Over the last few decades, space exploration has revolutionized our understanding of our place in the cosmos. We now know that there are many habitable environments within our solar system. Yet a profound question remains: are we alone in the universe? Nathalie A. Cabrol, leading astrobiologist and director of the Carl Sagan Centre at the SETI Institute, takes us to the frontiers of the search for life. This book's odyssey begins by searching for how life began on Earth in order to understand what's necessary for life to exist elsewhere. What role did our Moon play? And could life on Mars, or another world, have seeded life on Earth? Cabrol continues this dazzling interplanetary tour, illuminating the likeliest places for life in our neighbourhood, Venus, Mars, the icy moons of Jupiter...

PROCESS REALISM IN PHYSICS

PROCESS THOUGHT

DE
G

Acc. No : 49965

Call No : 530 PEN-W

Science should tell us what the world is like. However, realist interpretations of physics face many problems, chief among them the pessimistic meta-induction. This book seeks to develop a realist position based on process ontology that avoids the traditional problems of realism. Primarily, the core claim is that for a scientific model to be minimally empirically adequate, that model must describe real experimental processes and dynamics. Any additional inferences from processes to things, substances or objects are not warranted, and so these inferences are shown to represent the locus of the problems of realism. The book then examines the history of physics to show that the progress of physical research is one of successive eliminations of thing interpretations of models in favour of more...

Dynamics in Microwave Chemistry

 Springer

Acc. No : E-Book

Call No : 541.9 HUA-K

This book addresses microwave chemistry at both the physical and molecular levels. Its main goal is to elaborate on the highly complex scientific issues involved in the fundamental theory of microwave chemistry and in industrialised applications in the near future. The book provides detailed insights into the characterisation and measurement of dielectric properties under complex conditions, such as chemical reactions, high-temperature environments, etc. Considerable attention is paid to the theory of dynamics in microwave chemistry, from the view of both the physical level and the molecular level. Microwave-Material Interactions simulation is used for physical dynamical analysis, while a Microwave...

A PRIMER ON BRAIN STROKE AND HEART ATTACK

RAKESH MITTAL

Acc. No : G0100

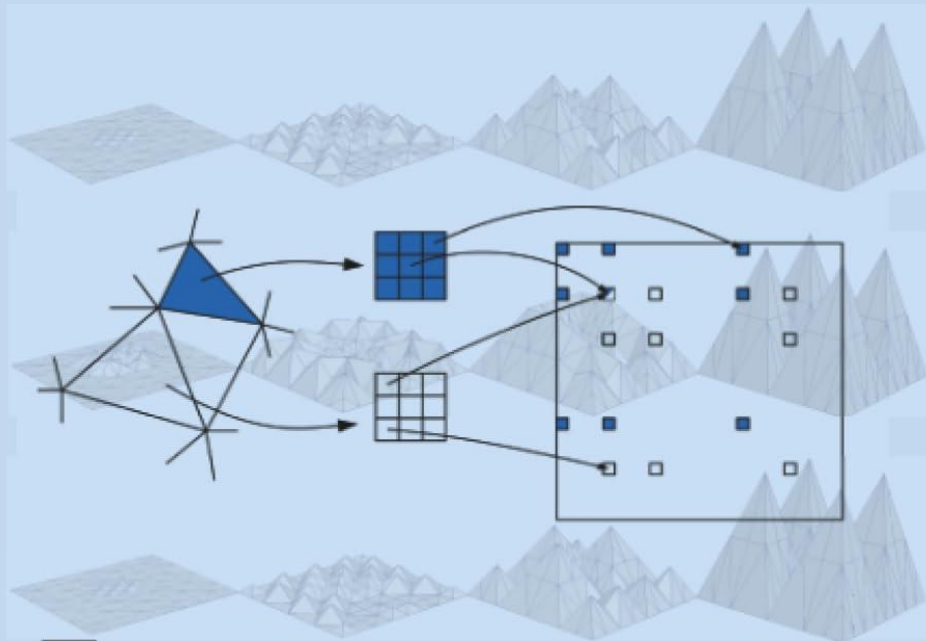

Call No : 616.81 MIT-R

This is a textbook for a one-semester course in Mittal Institute of Technology & Science. It can be read by anyone, but it is recommended that it be read under the supervision of an expert in the field. The author is a computer scientist and will not be responsible for misconceptions. The subject is life sciences. Doctors study medical science, the branch of knowledge about the human body. The public depends on doctors for the health of their bodies. A better understanding between the doctors and the general public can result in better health outcomes. This is no longer an option but a necessity because of newer expectations from medical science. Advances in technology and medical science have increased the workload on doctors. A specialisation requires tremendous effort on the part of doctors to...

Martin Weiser

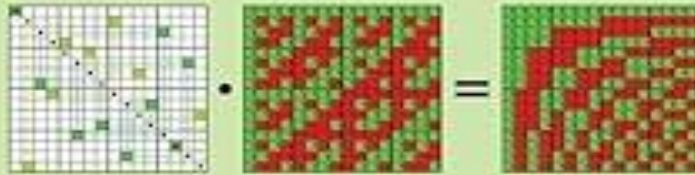

INSIDE FINITE ELEMENTS

Acc. No : 49958

Call No : 620.00151 WEI-M

All relevant implementation aspects of finite element methods are discussed in this book. The focus is on algorithms and data structures as well as on their concrete implementation. Theory is covered only as far as it gives insight into the construction of algorithms. In the exercises, a complete FE-solver for stationary 2D problems is implemented in Matlab or Octave. Contents: Finite Element Fundamentals, Grids and Finite Elements Assembly Solvers, Error Estimation, Mesh Refinement, Multigrid Elastomechanics, Fluid Mechanics Grid Data Structure, Function Reference. This book deals with the algorithmic realization of finite elements methods for partial differential equations and complements general textbooks on numerical analysis of partial differential equations and complements general textbooks on...

POWER ELECTRONIC SYSTEMS

WALSH ANALYSIS WITH MATLAB®

Anish Deb
Suchismita Ghosh

 CRC Press
Taylor & Francis Group

Acc. No : 48145

Call No : 621.3810 DEB-A

Power Electronic Systems, Walsh Analysis with MATLAB builds a case for Walsh analysis as a powerful tool in the study of power electronic systems. It considers the application of Walsh functions in analyzing power electronic systems and the advantages offered by Walsh domain analysis of power electronic systems. Solves Power Electronic Systems in an Unconventional Way. This book successfully integrates power electronics as well as systems and control. Incorporating a complete orthonormal function set very much unlike the sine and cosine functions, it introduces a blending between piecewise constant orthogonal functions and power electronic systems. It explores the background and evolution of power electronics, and discusses Walsh and related orthogonal basis functions. It develops the...

Brian Stone

Chatter and Machine Tools

Acc. No : E-Book

Call No : 621.9 STO-B

Focussing on occurrences of unstable vibrations, or Chatter, in machine tools, this book gives important insights into how to eliminate chatter with associated improvements in product quality, surface finish and tool wear. Covering a wide range of machining processes, including turning, drilling, milling and grinding, the author uses his research expertise and practical knowledge of vibration problems to provide solutions supported by experimental evidence of their effectiveness. In addition, this book contains links to supplementary animation programs that help readers to visualise the ideas detailed in the text. Advancing knowledge in chatter avoidance and suggesting areas for innovations, Chatter and Machine Tools serves as...

Molecular Simulation on Cement-Based Materials

From Theory to Application

 Science Press
Beijing

 Springer

Acc. No : E-Book

Call No : 624.1833 HOU-D

This book presents a number of studies on the molecular dynamics of cement-based materials. It introduces a practical molecular model of cement-hydrate, delineates the relationship between molecular structure and nanoscale properties, reveals the transport mechanism of cement-hydrate, and provides useful methods for material design. Based on the molecular model presented here, the book subsequently sheds light on nanotechnology applications in the design of construction and building materials. As such, it offers a valuable asset for researchers, scientists, and engineers in the field of construction and building materials. The general background on the cement hydrate is introduced in this chapter. The characteristics of the C-S-H gel obtained by various experimental...

ROBOTIC ARMS

Matt Eaton

26 Projects
to Learn, Build,
and Control
with Inverse
Kinematics

Acc. No : 50197

Call No : 629.892 EAT-M

Your journey into the exciting world of robotics starts now. Make, Robotic Arms is an incredibly accessible, hands-on guide to designing, building, and controlling robotic arms, the cornerstone of modern robotics. This is not a book for hardcore engineers; it's written for students, teachers, and tinkerers with no previous experience required. Using simple, affordable parts, this book will teach how to build a robotic arm, control it with an Arduino, and add servos to increase the degrees of motion for progressively complex movements. Readers will also learn inverse kinematics, a mathematical process that enables robots to move, lift, and draw with amazing precision. Make Robotic Arms is a comprehensive course on how to. Build two-, three-, and four-link robotic arms. Control the arms with...

ENTREPRENEURIAL MARKETING

BEYOND PROFESSIONALISM
TO CREATIVITY, LEADERSHIP,
AND SUSTAINABILITY

Acc. No : 50254

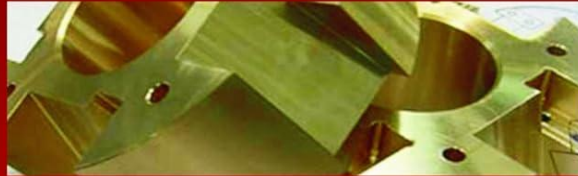

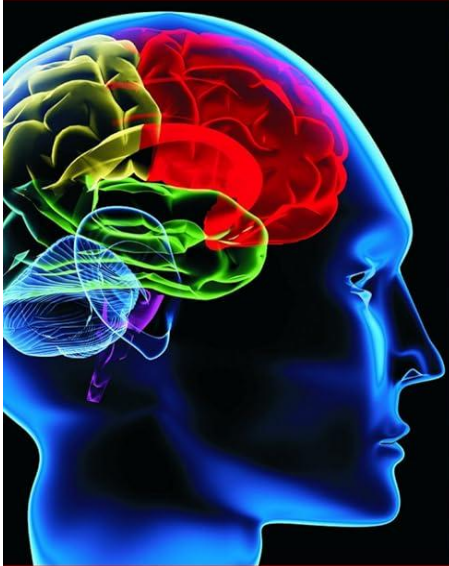

Call No : 658.8001 KOT-P

In **Entrepreneurial Marketing: Beyond Professional Marketing**, a renowned team of marketing leaders, including the Father of Modern Marketing, Professor Philip Kotler, delivers a groundbreaking and incisive redefinition of entrepreneurial marketing. In the book, some of the marketing sector's brightest minds explore the increasingly essential initiative to build new capabilities beyond the mainstream marketing approach that also considers the effect of digital connectivity on consumers and companies everywhere. This book also discusses what marketers need to do to break the stagnation of normative marketing approaches that are often no longer effective in dealing with dynamic business environments. The authors introduce a fresh entrepreneurial marketing approach, converging...

NEW AGE

Product Design and Manufacturing

A Product Life Cycle Approach

Editors

**Srinivasa Prakash Regalla
Kuldip Singh Sangwan**

NEW AGE INTERNATIONAL PUBLISHERS

Acc. No : 48964

Call No : 670 REG-S

The book covers the current philosophy, latest updates on methodologies and techniques of product design and manufacturing, with a special emphasis on the collaborative approach of design for the product life cycle. The design for the product's life cycle is an important aspect, without which the progress may be unilateral without a balance among the different important issues of all stages of the product life cycle. This normally can result in too many design changes, thus increasing the cost of the product as well as the lead time. These consequences are unaffordable for any company in the modern scenario of competitive and global markets. Thus, the framework of the product life cycle is used in this book to provide a binding constraint to drive the discussions towards a converging idea of...

MRINAL SEN

The Absence Trilogy

EKDIN PRATIDIN • KHARIJ • EKDIN ACHANAK

Acc. No : 50466

Call No : 791.43 SEN-M

Renowned Indian filmmaker Mrinal Sen, celebrated for his pioneering contributions to parallel cinema, offers sensitive portrayals of the middle-class psyche in his films *Ekdin Pratidin*, *Kharij*, and *Ekdin Achanak*. Regarded among his finest works, these films, though not strictly a trilogy, have been produced years apart. Each explores the theme of absence: the sudden disappearance of an individual, the resulting exposure of underlying values, and the profound changes in relationships and attitudes among those left behind. This volume features shot-by-shot reconstructions (as in post-production film scripts) of all three films, alongside a comprehensive introductory essay from Somnath Zutshi. It is richly illustrated with black-and-white reproductions of scenes from the films, providing a...

A GENRE OF HER OWN

Life Narratives and Feminist Literary
Beginnings in Modern India

GAYATHRI PRABHU

BLOOMSBURY

A Genre of Her Own offers an alternative account of literary beginnings in modern India through a surprising range of self-fashioning by women in genres such as pamphlets, letters, travelogues, essays, autobiographies and novels. Paying close attention to style and intentionality, this study traces mixed affective notes of pride, despair, lament, nostalgia, anger, hope and celebration in texts written in Marathi, Bengali, Urdu and English. These writers crafted a full-fledged, introspective and formally sophisticated aesthetic in conversation with a normatively male literary milieu. In doing so, they overtly engaged with the centrality of writing, the dangers and secrecies involved, against an emerging proscenium of world literature. The narrative motifs encompass marriage and...
