Acc. No : 50727

Call No : 300.72 LAW-W

Social Research Methods presents a comprehensive and balanced introduction to both qualitative and quantitative approaches to social research with an emphasis on the benefits of combining various approaches. It is about both research methodology and research methods, including the techniques of research design, measurement, data collection, and data analysis. It covers not only specific research techniques but also provides an insight into the bigger issues involved in conducting social research. This book aims to support students' learning about methodology beyond learning to become a capable researcher, and helps them develop into responsible, reflective social scientists with insight and judgement. The text is a combination of both qualitative and quantitative approaches to social...

The US is the source of just about all the technologies that define modern life: personal computers, operating systems, smartphones, e-commerce, web browsers, email, search engines, social networks, electric cars and the rest. And most of the tech companies that created and monetized these technologies are also in the US. In this book Mehran Gul, the winner of the Financial Times or McKinsey Bracken Bower Prize, asks: is that changing? Less than a decade ago, the sentiment towards Chinese tech companies was often dismissive and complacent. Now the alarm bells are ringing. But as the commentariat pontificates how the US–China tech battle will play out, an equally interesting question to ask is: are there more Chinas out there? Places no one is taking seriously now that might turn out to be...

A former top bureaucrat reveals how India manages its money, and the political landmines he navigated to protect public interest. For over three decades, Subhash Chandra Garg was at the heart of India's bureaucratic battlefield, crafting policies, managing crises and maneuvering through the power struggles that define governance. From the villages of Rajasthan, where land disputes could spark violent protests, to the corridors of power in Delhi, where economic decisions could make or break the nation, Garg's career as a civil servant was anything but ordinary. As Finance Secretary of India, he played a pivotal role in reshaping India's economic policies, battling entrenched interests and pulling states back from financial ruin. He confronted corruption head-on, took on international financial institutions and...

As Indians, we are curious about the kind of education system we had before the British arrived. Did all sections of society have access to basic education? Were women educated? Were there any medical practitioners? How were scholars and artists trained? **Land of Pathshalas: A Story of Indigenous Indian Education** provides answers to these questions by presenting a refreshing narrative of Indian education in the 19th century. It documents a wide range of pre-colonial institutions that catered to different occupations of the time. In doing so, it analyses the methods of knowledge transmission using Indian epistemological categories such as Yoga and dharma. Drawing from a wide range of sources, including government surveys, census reports, foreign accounts, district gazetteers, autobiographical accounts, and...

Acc. No : 50745

Call No : 382.09165 CUN-B

The Silk Road may be one origin of globalisation, but the Indian Ocean is another. Barry Cunliffe examines the beginning of maritime trade using the evidence of archaeology and the tales of great travellers such as Marco Polo, Ibn Battuta, and the Chinese Admiral, Zheng He. This story complements that of the land routes, showing how humans have been driven across thousands of years to create and maintain networks, whatever the difficulties. *Driven by the Monsoons* illuminates maritime connections between the Indian Ocean and its surrounding water routes: the Arabian Gulf and the Red and China Seas. It begins with the movement of humans into South-East Asia and ends about 1600 CE when European companies emerge to takeover. It is tale of exotic goods, material needs...

MICHAEL ARTIN

Acc. No : 50849

Call No : 512.9 ART-M

Algebra, Updated 2nd Edition by Michael Artin is ideal for the honours undergraduate or introductory graduate course. This revision of the classic text incorporates 20 years of feedback and the author's own teaching experience. It discusses concrete topics of algebra in greater detail than most texts, preparing students for the more abstract concepts; linear algebra is tightly integrated throughout. High emphasis on concrete topics such as symmetry, linear groups, quadratic number fields, and lattices prepares students to learn more abstract concepts. The chapter organization emphasises the connections between algebra and geometry at the start, with the beginning chapters containing the content most important for students in other fields. Treatment beyond the basics sets this...

Acc. No : 50886

Call No : 572.633 BRA-C

Introduction to Protein Structure provides an account of the principles of protein structure, with examples of key proteins in their biological context, generously illustrated in full color to illuminate the structural principles described in the text. The first few chapters introduce the general principles of protein structure, both for novices and for non-specialists needing a primer. Subsequent chapters use specific examples of proteins to show how they fulfil a wide variety of biological functions. The book ends with chapters on the experimental approach to determining and predicting protein structure, as well as engineering new proteins to modify their functions. The proteins we observe in nature have evolved, through selective pressure, to perform specific functions. The functional properties...

Acc. No : 50882

Call No : 601.4 THA-J

This book explicates the relationships between design thinking, critical making, and socially responsive technical communication. It leverages the recent technology-powered DIY culture called the Maker Movement to identify how citizen innovation can inform cutting-edge social innovation that advocates for equitable change and progress on today's wicked problems. After offering a succinct account of the origin and recent history of design thinking, along with its connections to the design paradigm in writing studies, the book analyses maker culture and its influences on innovation and education through an ethnographic study of three academic makerspaces. It offers opportunities to cultivate a sense of critical changemaking in technical communication students...

Antibiotics are one of humanity's greatest achievements, but our access to them is under threat. Discover their miraculous history and how we confront their uncertain future. Since their advent, antibiotics have saved millions of lives, marking one of the greatest medical advances in our history. Dangerous Miracle weaves together the grand arc of the evolution of antibiotics over millions of years with a history of the past century: first as we mined the earth for naturally occurring antibiotic molecules, then as we learned to synthesise our own. But like fossil fuels, antibiotics are a finite resource that we've regarded as a cheap, everlasting fuel. They are unlike other drugs: every time we use them, we increase the possibility of antibiotic resistance emerging, risking their future effectiveness...

Propeller Design

Ohad Gur

Acc. No : 50321

Call No : 629.1343 GUR-O

Propellers have gained popularity in recent decades as part of UAVs, multi-blade drones, and VTOL air taxis. However, modern books dealing with propellers are scarce. Most of the rotating wing literature concentrates on helicopters. Other books dedicate specialised chapters to propellers, in most cases as part of general aerodynamic or performance texts. Propeller Design by Ohad Gur, therefore, fulfils a gap in modern literature amidst increased interest in the topic. This book sums up three decades of the author's experience with propeller analysis and design. As such, special care is given to the suitability of the analysis as part of a synergetic design framework. The book starts with the general history of propeller evolution and a view of the propeller design problem, which contains the fundamental vocabulary...

Acc. No : 50865

Call No : 691.3 KAR-A

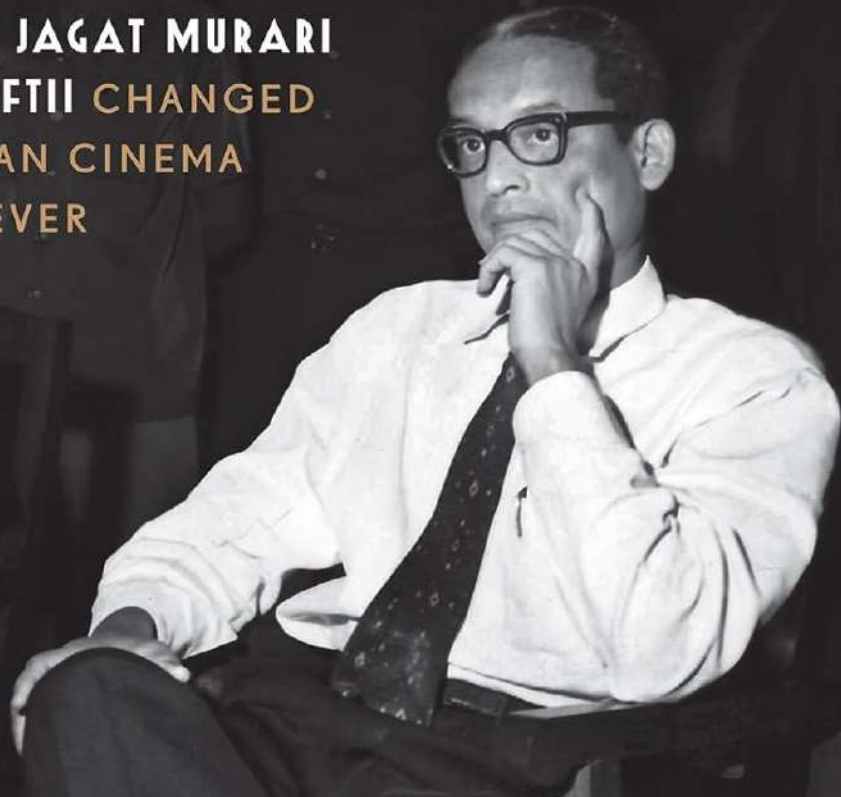

Alkali-activated Concrete is a potential substitute for traditional Portland cement concrete. However, uncertainties regarding its chemistry and a lack of information on long-term practical performance restrict it to precast applications. Several studies have addressed the chemistry and mechanical properties of AAC. So, this book emphasises the long-term characterisation of AAC, especially under the following categories: High-temperature exposure, drying shrinkage, and Environmental impact assessment. The performance of AAC under each of these categories is significantly enhanced compared to traditional Portland cement. With the recent need for sustainable construction and the increasing number of standards for AAC, it can soon find wider practical usage as a partial or complete...

During the two difficult decades immediately following Independence, a new, commercially successful print culture in Hindi emerged that articulated alternatives to dominant national narratives. Through what Aakriti Mandhwani defines as middlebrow magazines like Delhi Press's Sarita and the first paperbacks in Hindi Hind Pocket Books, the North Indian middle classes cultivated new reading practices that allowed them to reimagine what it meant to be a citizen. Rather than focusing on individual sacrifices and contributions to national growth, this new print culture promoted personal pleasure and other narratives that enabled readers to carve roles outside of official prescriptions of nationalism, austerity and religion. But the story is as much about the publishers as the readership. Sarita's...

From the annexation of the princely state of Hyderabad in September 1948 to the formation of Andhra Pradesh in 1956 and the eventual creation of Telangana in 2014 these broad brushstrokes of Hyderabad's history are well-documented. What has long been missing, however, is the perspective of the people, the different communities who lived through these upheavals--the communal violence of Independence and Partition, the push for a linguistic re-imagination of the state and its bifurcation, the long-drawn-out struggle for statehood and those who were forced to adapt to a rapidly changing India. For the first time, Daneesh Majid brings their stories to light. Drawing from generational interviews, oral histories, literature in Urdu and English and his own personal experiences, he drafts a modern...
