26 FEB TO 1 MAR

INTERNATIONAL WORKSHOP ON DATA ANALYTICS & APPLICATIONS, 2013

Venue: BITS Pilani, KK Birla Goa Campus, Goa, India

Data Analytics is now pervasive across all aspects of our lives and has resulted in several application domains. All these applications involve large volumes of data and require high performance computing solutions. Dissemination of a common set of tools and techniques for addressing these requirements has become very relevant. The workshop aims to bring in research expertise, both from academia and industry, to enable practitioners and educators to gain insight into the exciting field of data analytics. Participants of the workshop will get an opportunity to interact with experts in the area.

Day 1: Data Analytics-Current Trends

Day 2: Data Analytics-Applications

Day 3: Information Retrieval
and Web Mining

Day 4: HPC & Big Data Analytics

Topics to be covered

Current & Future trends in Data Analytics, Data Visualization, Data Science, Bioinformatics, Agri-Bioinformatics, Social Media Analytics, Text/Multimedia Information Retrieval, HPC for Data Analytics, Big Data Analytics, Parallelization of Data Mining Algorithms, MapReduce, Hadoop.
