

BITS Pilani signs MoU with Dongguk University

NT KURIOCITY

The department of Chemical Engineering at BITS Pilani, K K Birla Goa Campus, and the department of Biomedical Engineering at Dongguk University, South Korea, signed an MoU. Head of the department of Chemical Engineering at BITS Pilani Goa Campus, professor Srinivas Krishnaswamy, and head of the department of Biomedical Engineering at Dongguk University Seoul Campus, professor Seung Hoon Yang, signed the MoU.

Through this MoU, both institutions agree to enhance research and development (R&D) in teaching, research, and continuous education. Possible activities and meas-

ures will include exchange of information material and publications/patents, student exchange/faculty exchange programs and practical training opportunities abroad and organising workshops and conferences.

Director of BITS Pilani, Goa Campus, professor Suman Kundu said, "We recognise the importance of research collaborations and believe that working with the Department of Biomedical Engineering at Dongguk University would help our students get the best possible exposure to a wide range of research topics and faculty support. This partnership will raise the bar for students' research skills in higher education and open the door to improved research and citation."
